Major Primary Timber Processing Facilities in British Columbia

1999

Economics and Trade Branch
Ministry of Forests
Victoria, B.C.

April, 2000

Foreword

This is the 1999 edition of the Ministry of Forests' *Major Primary Timber Processing Facilities in British Columbia* and refers to timber processing mills which have primary log processing capability and which operated during 1999. Coverage does not include re-manufacturing plants. Pulp and paper mills and panel plants are included in this report even though some do not have primary log processing capabilities.

Information for this report are from processing mills' responses to an annual Ministry questionnaire. Not all mills responded to the questionnaire. Other sources of information include trade publications, directories and corporate annual reports. The cooperation of mill personnel who responded to the questionnaire is gratefully acknowledged. A copy of this report is sent to the mills listed in this report.

Where a mill produces more than one product (e.g. lumber and plywood; lumber and paper), it will be listed in the respective sections of the report. Mills which did not operate a full year during 1999 have been identified with an asterisk (*).

This report is updated annually and is available, upon request, to the general public. Any errors or omissions in this report should be communicated to:

CHIP MILLS

(Listed Alphabetically)

Only mills which produce wood chips as a primary product are listed in this report.

1. Measurement units are in thousands of bone dry units (000 BDUs).

2. Estimated annual capacity is based on 480 8-hour shifts per year.

LOG HOME MILLS

(Listed Alphabetically)

Only mills which are capable of processing logs to manufacture log homes are listed in this report.

Through-put capacity measurement units are not as meaningful for log home mills as for other types of primary timber processing mills. Therefore only information pertaining to mill name and location are listed in this section.

LUMBER MILLS

(Listed Alphabetically)

1. Measurement units are in millions of board feet (million bf).

2. Estimated annual capacity is based on 480 8-hour shifts per year, although mills may vary from this schedule.

There are two categories of lumber mills in this report:

1. Mills which produced more than 3 million board feet (million bf) of lumber during the year.

2. Mills which produced less than 3 million board feet (million bf) of lumber during the year.

VENEER, PLYWOOD, AND OTHER PANEL MILLS

(Listed Alphabetically)

All operating veneer, plywood and other types of panel mills are listed in this report. For mills which produce both market veneer and plywood, veneer capacity includes market veneer and the veneer which is used within the mill to manufacture plywood. Panel mills which use wood residuals to produce panels or which do not have log processing capability are also listed in this report.

1. Measurement units are in millions of square feet, 3/8" basis (mill. sq. ft., 3/8").

2. Estimated annual capacity for veneer mills is based on 480 8-hour shifts per year; for plywood mills, and other panel mills, 720 8-hour shifts per year.
